NOTES ON INDEX TO M8TC NEWSLETTER.

The index is to technical articles, main feature and newspaper articles and other similar articles. Trip reports are not included.

Date corrections;

There are a number that have missing both year and month on the newsletter or missing either month or year date. There are also a number of duplicated months ie with the same date and month just to add to the confusion. If the newsletters are sorted before using it should be possible to get most in the correct sequence so the index can be used

For the duplicated April 94, one is actually April 95. In some years a newsletter was produced every month for others every second month.
